U.S. Fish and Wildlife Service Migration of Birds - CSU Home

Bird Migration Teacher's Guide INTRODUCTION Bird Migration is a worldwide phenomenon that happens for many varied reasons. Temperature changes, seasonal fluctuations in food supplies, breeding needs, and territorial considerations all play a role in the why of migration. Routes vary from species to species, as well as from individual to individual.

Bird Migration Teacher's Guide

be from about 30 km/h for the smallest birds and up to 80 km/h for larger birds. Birds may divide the journey into shorter or longer stages; the smaller the bird, the shorter the stages. Time spent at stop-over sites is used for feeding and resting. A small bird has at the most enough "fuel" to fly for up to 70-90 hours.
